EASTWIND GOURMET · FROM A MONDAY GUESS TO A MONDAY ORDER

Forecast-driven replenishment

Eastwind orders festival gifts for the week the festival fell last year, so shelves run empty before Mid-Autumn and fill up after it.

For the VP Merchandising and the CIO

October 2026

THE OUTCOME

What you get

LOST SALES RECOVERED · TARGET

$2–3M/yr

20–30% of the $10.3M/yr you lose on peak gifts

A target for the pilot to prove, not a result yet

WASTE GUARDRAIL

+$42k/yr

Waste roughly flat: ~1% of the $3.87M/yr base, in the backtest

Not a saving. Waste-aware ordering is the day-60 item

FLAGGED THIS ORDER WEEK

$3.6M

of peak-gift sales at risk without an order

481 of 908 peak-gift lines need an order, order week of Aug 31, 2026

VP Merchandising: full shelves in the festival lead-up, with orders your managers approve on one screen.

CIO: one platform from POS files to approved order, so manager decisions flow back into the data.

THE PROBLEM

Last year's calendar

$17.8M/yr

lost sales from empty shelves across 80 stores

$10.3M/yr

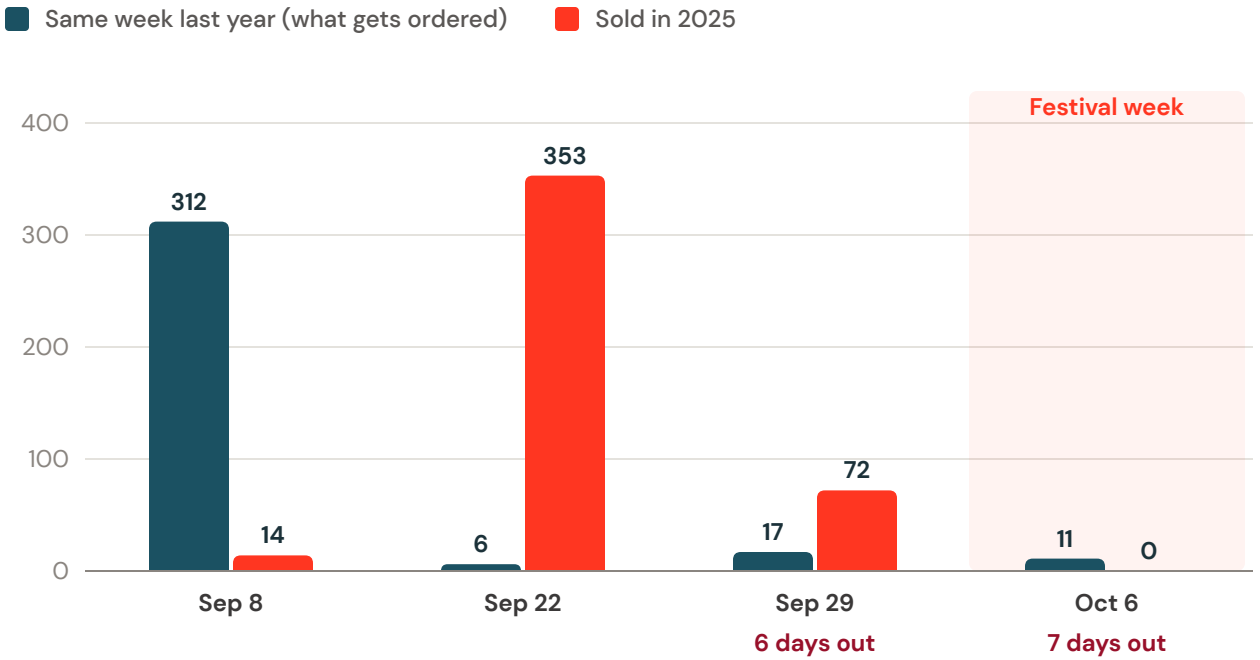

of that on peak gifts, 57.5% of all lost sales

18.7–21.1%

of peak-gift store-days out of stock in Mid-Autumn 2025, vs 8.6% overall

ZHONGSHAN SHOP · CLASSIC LOTUS MOONCAKE BOX · MID-AUTUMN 2025

Stocked for 2024's peak, out of stock for 2025's

Mid-Autumn fell on Sep 17 in 2024 and Oct 6 in 2025. Chart shows the four weeks in the evidence spot check. Waste is a further $3.87M/yr.

FOR THE CIO

Why it's hard

01

Fragmented feeds

POS · ERP inventory · Product catalog · Store master · Holiday calendar

Different owners, formats, and refresh cycles. Even store IDs differ: DT001 vs L0001.

HOW WE HANDLE IT

Lakeflow reconciles all five into one governed gold table.

02

Stockouts hide demand

When the shelf is empty, sales stop. History records what sold, not what customers wanted.

HOW WE HANDLE IT

Training skips weeks with two or more days out of stock.

03

The usual fix: six tools

ETL tool · Warehouse · ML platform · OLTP database · BI / chat · App hosting

Each hop adds a copy, a handoff, and another set of permissions to keep in sync.

HOW WE HANDLE IT

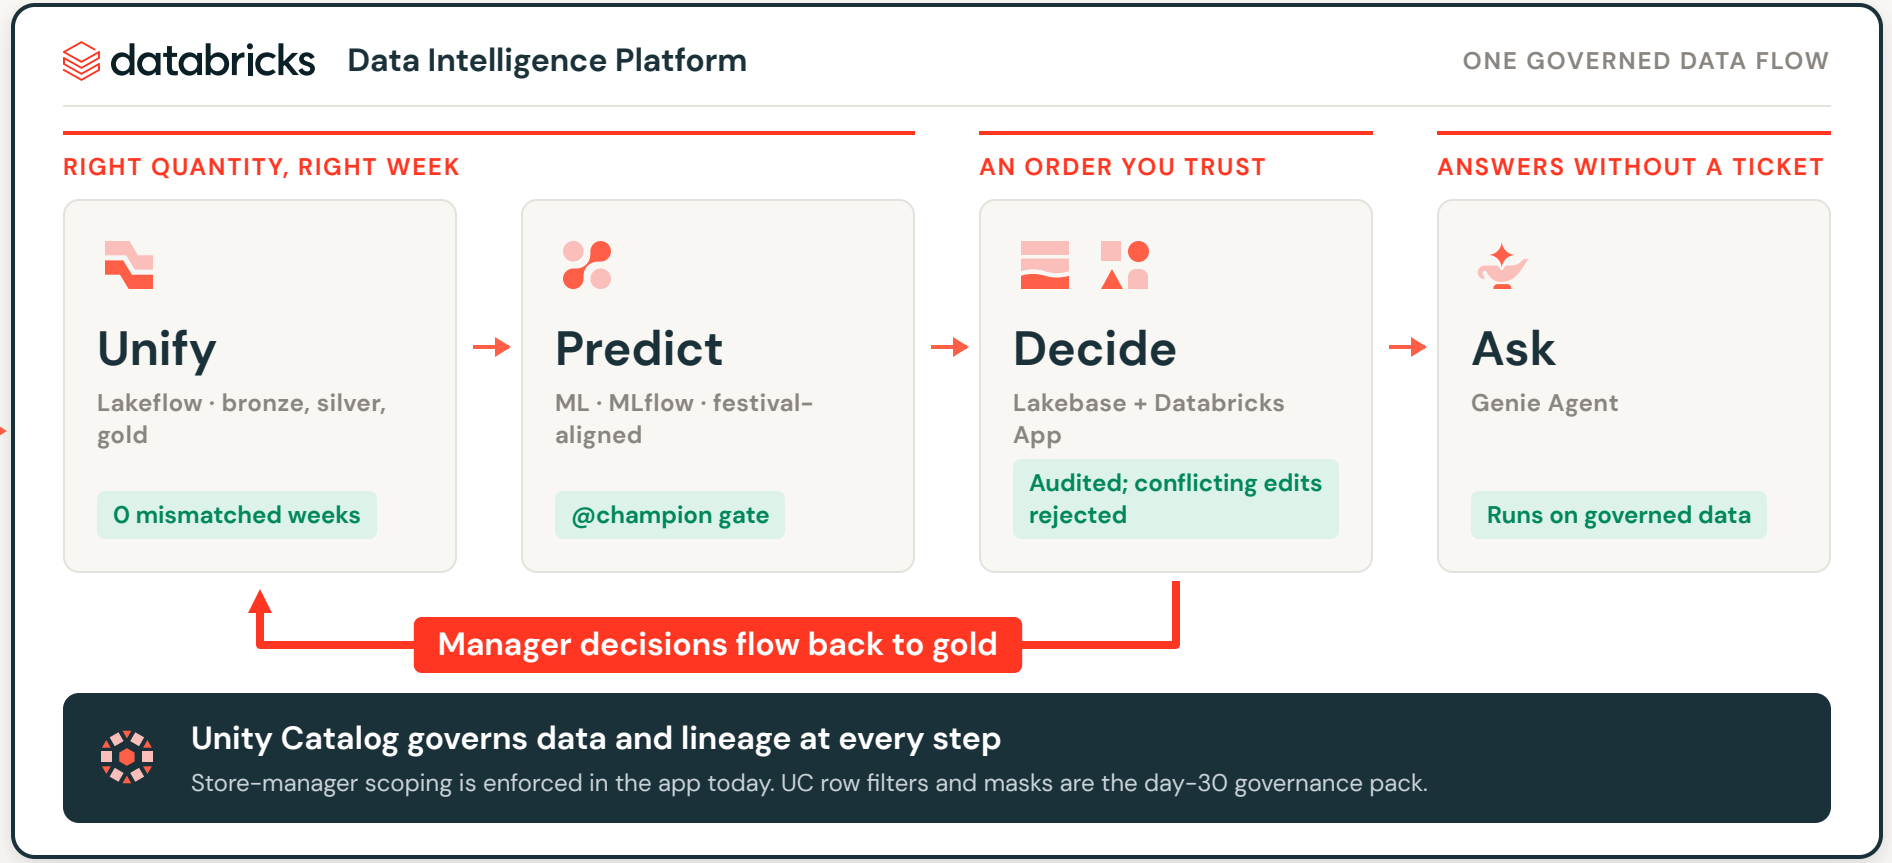

One platform, one governed data flow.

ARCHITECTURE

One platform, end to end

Your POS and ERP keep running. They just drop files.

- POS sales
- ERP inventory
- Product catalog
- Store master
- Holiday calendar

THE DEMO

What you'll see

One store, one mooncake box, one festival

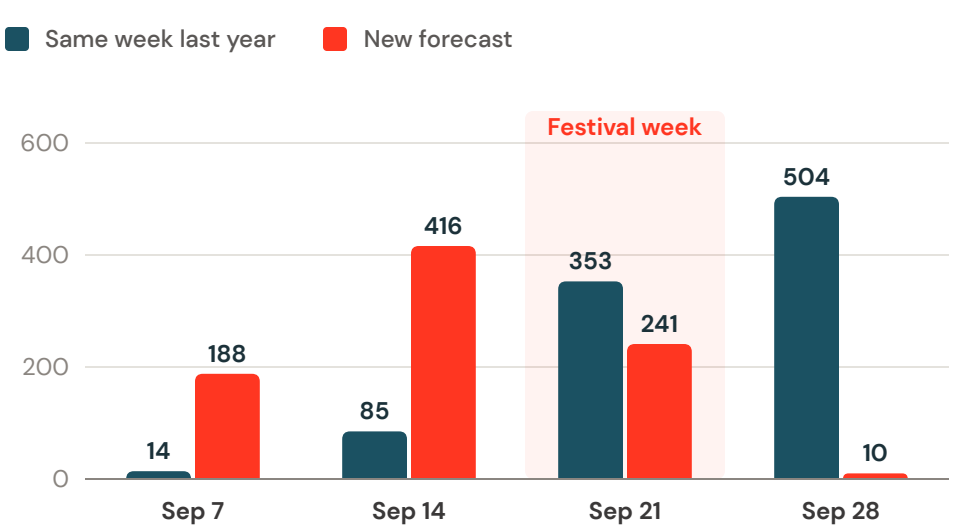

01 **The order week**
481 of 908 peak-gift lines need an order. $3.6M of peak sales flagged.

02 **One line you can trust**
Zhongshan Shop's Classic Lotus Mooncake Box, with its reason and plan-for range.

03 **Approve, then ask**
Accept or adjust with a reason. Then ask Genie which highway stores are most at risk.

ZHONGSHAN SHOP · CLASSIC LOTUS MOONCAKE BOX · 2026

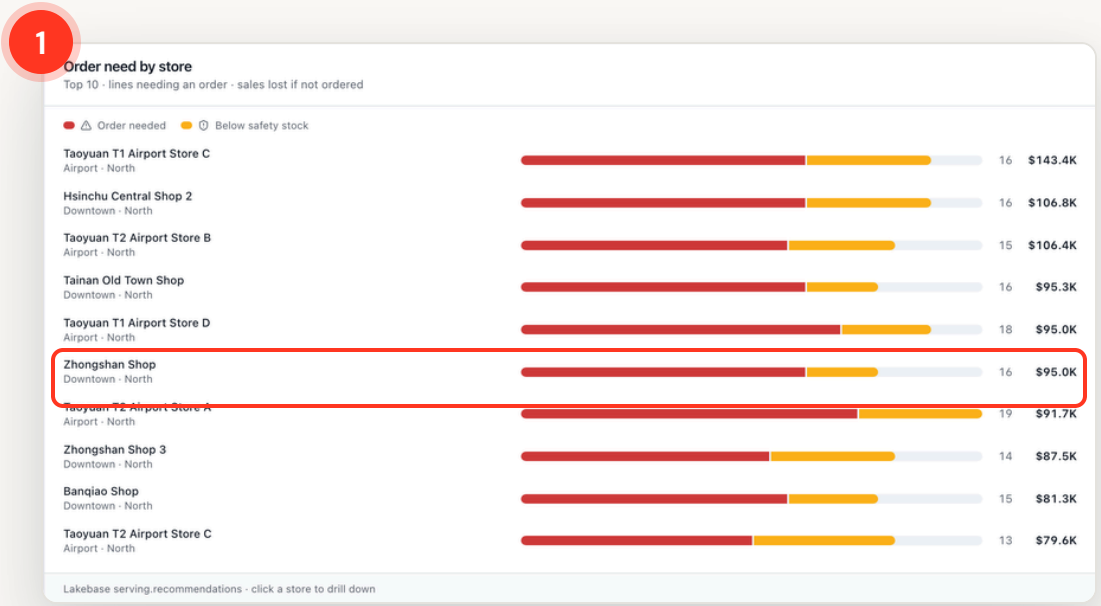

The forecast fixes the calendar mistake

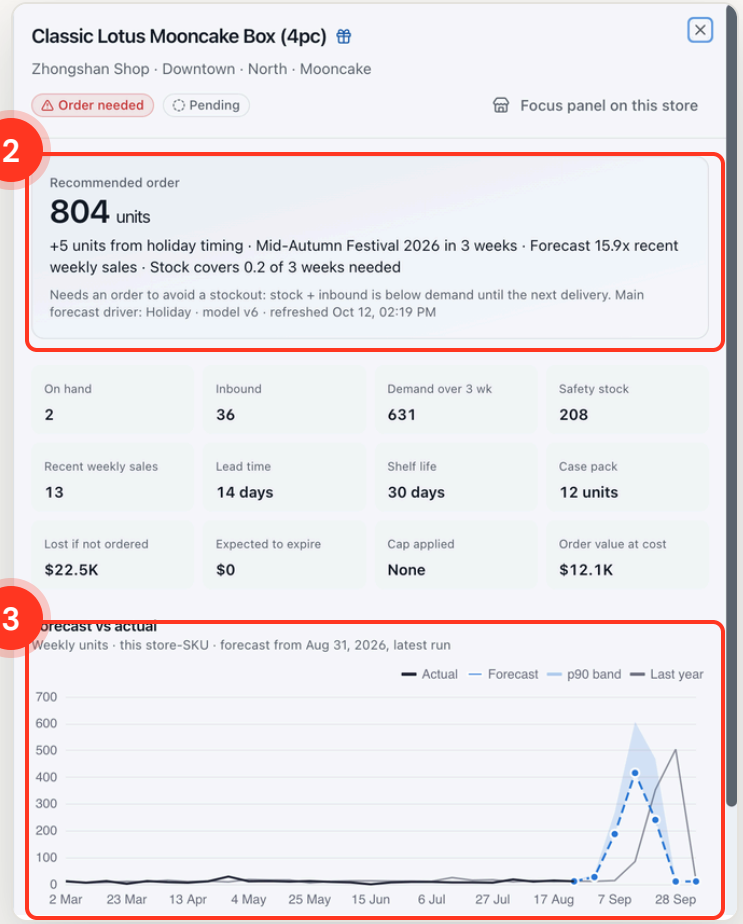

Forecast units from the latest weekly run. Mid-Autumn 2026 is Sep 25. A forecast, not an outcome.

THE APP

What managers see

1 **Region North, ranked:** Zhongshan Shop is in the top ten.

2 **Why this quantity**
Mid-Autumn in 3 weeks · forecast 15.9x recent sales
Model v6 · shelf life 30 days · no cap applied

3 **Plan for the peak:** forecast and p90 peak before the festival.

IMPACT AND PROOF

Proven vs next

SUCCESS MEASURE	EVIDENCE	STATUS	NEXT
Forecast accuracy by channel	Beats last year's method in every channel and both holiday seasons	Proven	Track live by channel
Stockouts on peak gift SKUs	Modelled lost sales down in 6 of 6 holiday windows Baseline: 18.7–21.1% of peak-gift days out	Simulated	Measure in the pilot
Expired and marked-down value	Roughly flat: +$42k/yr, ~1% of the $3.87M/yr base	Guardrail	Waste-aware ordering
Orders placed from forecast	Not measured yet: test decisions only	Not yet	Measure in the pilot

HOLIDAY BACKTEST

6 of 6

holiday windows with lower lost sales; waste roughly flat, up ~1%

Mid-Autumn 2025 and Lunar New Year 2026, each in 3 channels. Simulation on synthetic data

FOR THE CIO

0 mismatched weeks, gold vs source

40 of 40 planted bad records quarantined

Spoofed identity ignored; out-of-scope decisions refused

ROADMAP

30 / 60 / 90 days

Day 30

Governance pack

UC row filters by region, cost masks, persona groups, column comments.

Day 60

Waste-aware ordering

Shelf-life and waste limits in the order rule; replay a full year.

Day 90

One-region pilot

Timed to cover the next Lunar New Year peak. Managers order from the app.

THE ASK

Approve a one-region pilot

YOU MEASURE

Peak-gift out-of-stock rate vs the 18.7–21.1% baseline

Share of orders placed from the forecast

Waste vs today's $3.87M/yr base
